

STAD SING

Dan-Mop® SmartClean Mini - with an innovative new dosing system!

**NEW
Product!**

- ✓ Use any type of 40 cm flat mop Velcro, Pocket etc.
- ✓ Use only the mops you need
- ✓ No need to wash unused mops
- ✓ No need for pre-wash or prepare the mops
- ✓ Always the same amount of solution across the mops
- ✓ Solution is absorbed almost instantaneously
- ✓ Easy to adjust dispensed solution (100 ml - 300 ml)
- ✓ Closed system - no open water containers
- ✓ Ergonomics ▶ Adjust the trolley to fit any user

STADSIING

Specifications:

- * Code no. 8450G
- * Material: Stainless Steel, Plastic
- * Size: 70x65x100 cm (LxWxH)
- * Weight: 17 kg (599.65 ounces)
- * Colour: Steel/Dark grey
- * Packing: 1x1/carton, 1x6/pallet
- * Weight carton in kilos: 20 GW/17 NW
- * Size carton: 66x56x60 cm (LxWxH)
- * Customs tariff no: 87168000

Dan-Mop® SmartClean Mini

Dan-Mop® SmartClean Mini is a brand new type of cleaning trolley - it is characterised by its unique and innovative dosing system.

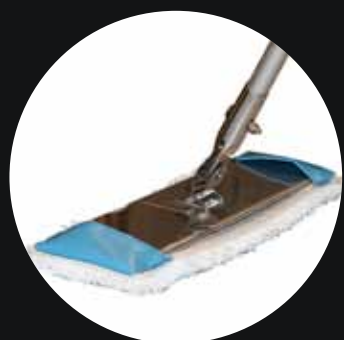

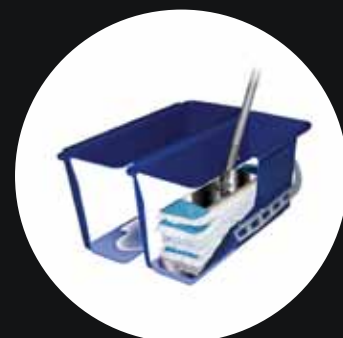

The cleaning trolley consists of a dosing chamber attached to a solution container. The dosing chamber can be adjusted in volume by moving a piston allowing the amount of water or solution to be dispensed, to be set anywhere between approximately 100ml and 300ml.

When a trigger is operated the dosing unit empties the specified volume of solution into a container. The mop is placed into the container, absorbs the solution, and is ready for use. When the trigger is released the chamber refills and is then ready for the next mop.

Dan-Mop® SmartClean Mini addresses all of the major issues that exist with current methods used to prepare mops:

- ▶ The mops will have the correct amount of solution allowing the designated floor area to be successfully cleaned.
- ▶ The mops will work more effectively and more efficiently due to the even distribution of the solution.
- ▶ The mops will not be left damp for long periods of time, reducing the risk of bacteria growth.
- ▶ Unused mops will not need to be laundered leading to significant cost savings and proving better for the environment.

Dan-Mop® SmartClean Mini provides the most controlled, efficient, hygienic and environmentally friendly system for preparing mops on the market to date.
