

Dan-Mop® Quick Velcro, mop with super absorbent sponge insertion, 60 cm

SKU: 4717

The Dan-Mop® Quick in microfibre has a super absorbent sponge insertion, which increases the mops ability to carry water. As a result it is unnecessary to re-dampen the mop quite as often, and meanwhile floors are left more dry than had they been cleaned with a regular mop. This makes the mop ideal for damp and wet cleaning tasks.

- With a super absorbent sponge insertion
- Can be washed at least 500 times
- Fits Dan-Mop® frames item no. 2627 and 2739
