

## 3M™ Safety helmet, Peltor, G3000NUV-LI

SKU: 40112670

The 3M safety helmet G3000 has a really good comfort. The headband ensures that the helmet fits well, it is light and very well balanced. It is intended for use in harsh work environments with high demands for effective protection, excellent ventilation and maximum field of view. You can turn the headband 180 ° so that it is possible to carry the G3000 upside down. Eg. in tight space conditions, climbing or need a good view upwards. The G3000 is tested and approved as a safety helmet, even when this solution is used. The red dial on the helmet: Uvicator™, tells when it is time to replace the helmet. When this is completely white, the helmet has been exposed to so much UV radiation that it can affect the stability of the helmet. This damage is not visible. Take no chances - replace the helmet.

- **Softly rounded design that helps to prevent the parts of the helmet from getting stuck in branches, etc.**
- **Narrow shadow that provides a wider field of view**
- **Weight 310 g**

## Specifications

Category	Safety Helmets
BrandSymbol	<b>3M</b> <b>PELTOR</b>
Colour	■ Lime
Size	54, 55, 56, 57, 58, 59, 60, 61, 62
